## PREFACE/PRÉFACE

As part of its mandate, the Public Archives of Canada has accumulated many census records relating to the historical development of present-day Canada. Most nineteenth-century census records which have been collected in their original form are located in the Federal Archives Division with the records of Statistics Canada, Record Group 31. These records have been microfilmed as a conservation measure and as a means of facilitating their use. In addition, microfilmed copies of census records held in original form in the provincial archives of Ontario, New Brunswick, Nova Scotia and Prince Edward Island, along with some fragmentary returns from other locations have been obtained by the Public Archives to complete the records already in our possession; these records are in the custody of the Manuscript Division.

In 1963, the Public Archives of Canada published checklists of its census returns on microfilm. In 1978, a Catalogue of Census Returns on Microfilm, 1825-1871 was published. That publication, in one volume, included all of the information of the earlier checklists, together with additions and corrections. In 1979, the Public Archives of Canada received copies of the 1881 census for distribution.

The present catalogue is a revised and expanded edition, listing census returns available on microfilm at the Public Archives of Canada for the years 1666 to 1881. Census returns subsequent to 1881 remain in the custody of Statistics Canada and are not generally available for research.

I wish to express appreciation to members of the staff of the Public Archives of Canada, particularly Thomas Hillman of the Federal Archives Division, who worked so diligently in compiling, editing and producing this often requested catalogue.

Dominion Archivist

Dans le cadre de leur mandat, les Archives publiques du Canada recueillent de nombreux dossiers sur les recensements. Ces dossiers font état de l'évolution historique du Canada et datent pour la plupart du XIX<sup>e</sup> siècle. Acquis dans leur forme originale, ils se trouvent à la Division des archives fédérales, avec les dossiers de Statistique Canada (groupe d'archives 31). On les a microfilmés afin d'en assurer la conservation et d'en faciliter la consultation. De plus, pour compléter leur collection, les Archives publiques ont acquis les microfilms de recensements dont les originaux sont conservés aux archives provinciales de l'Ontario, du Nouveau-Brunswick, de la Nouvelle-Écosse et de l'Île-du-Prince-Édouard, ainsi que les microfilms de résultats fragmentaires pour des recensements effectués dans d'autres régions du pays; ces documents ont été confiés à la Division des manuscrits.

En 1963, les Archives publiques du Canada publiaient des répertoires des recensements qu'elles possédaient sur microfilm. En 1978, elles faisaient paraître un ouvrage intitulé Catalogue de recensements sur microfilm, 1825-1871, qui rassemble en un seul volume toutes les informations contenues dans les publications antérieures ainsi que des ajouts et des corrections. Puis, l'année suivante, elles recevaient des copies du recensement de 1881 pour fins de diffusion.

Ce nouveau catalogue est donc une édition révisée et enrichie qui décrit les recensements microfilmés, conservés aux Archives publiques du Canada, pour les années 1666 à 1881. Les recensements postérieurs à 1881 demeurent la propriété de Statistique Canada, et, en général, ne sont pas mis à la disposition des chercheurs.

Nous remercions tous les employés des Archives publiques du Canada, et notamment Thomas Hillman de la Division des archives fédérales, qui ont travaillé avec diligence à la compilation, à la rédaction et à la production de ce catalogue tant attendu.

L'archiviste fédéral,  
W.I. Smith

## INTRODUCTION

This catalogue lists census returns on microfilm in the Public Archives of Canada for the present day provinces of Canada. A listing of the returns available for particular years for each province is included in the Appendix.

Many of the original returns for New Brunswick, Nova Scotia and Prince Edward Island prior to 1871 and some 1842 and 1848 Ontario returns are held by the respective provincial archives. As far as can be determined, the census returns for the year 1871 for Prince Edward Island have not survived, while only fragmentary returns for the 17th and 18th centuries for Newfoundland have been located.

With the exception of the census for 1861, preliminary information on the taking of any particular census can be found in the introduction to each volume of the published census reports, 1851 to date. For the census of 1861, the findings were published but no introductory material was provided. The published reports are available at most Canadian libraries or through interlibrary loan.

### Enumeration Districts

For the purpose of census enumeration, the provinces were divided into census districts, and those districts in turn were divided into sub-districts. Census districts, with a few exceptions, corresponded with electoral districts. As a general rule, census districts were synonymous with cities and counties, sub-districts with towns, townships and city wards. Villages, small towns, parishes and seigneuries were generally enumerated as part of the township in which they were located. However, users should be aware that census district and county boundaries did not always coincide. For example, Loughborough Township (Frontenac County, Ontario) is found in Frontenac census district for 1851 and 1861, but is attached to Addington census district for 1871 and 1881. In addition, districts were often reduced in size or disappeared completely with the creation of new districts between one census and the next. Furthermore, place names may have changed. Thus, Ottawa is found readily for 1861-1881, but was listed as part of Carleton County in 1842 and was known as Bytown in 1851. Users of this catalogue may therefore wish to consult a good historical atlas or an historical map collection in conjunction with their research.

In this catalogue, the microfilm reel numbers indicate where specific returns can be found, but are not intended to imply that returns for a particular district occupy the entire reel. Reels may contain returns for more than one district and some districts may be found on more than one reel.

La liste qui suit nous présente les recensements qui ont été microfilmés et que possèdent les Archives publiques du Canada pour chacune des provinces actuelles. En annexe, on trouvera d'ailleurs une classification de ces recensements, selon les provinces.

De nombreux originaux des recensements du Nouveau-Brunswick, de la Nouvelle-Écosse et de l'Île-du-Prince-Édouard, pour la période antérieure à 1871, et une partie des recensements de l'Ontario, en 1842 et en 1848, sont conservés par les archives de ces provinces. Selon toute indication, les résultats du recensement de 1871 à l'Île-du-Prince-Édouard n'existent plus, et, en ce qui concerne Terre-Neuve, nous n'avons retrouvé que des résultats fragmentaires pour les XVII<sup>e</sup> et XVIII<sup>e</sup> siècles.

Pour les rapports publiés des recensements, chaque volume paru depuis 1851, sauf celui de 1861, comporte une introduction renfermant des renseignements sur le dénombrement. Les résultats du recensement de 1861 ont été publiés mais le rapport ne contenait pas de renseignements préliminaires. On peut se procurer ces volumes dans la plupart des bibliothèques canadiennes et par l'intermédiaire du prêt entre bibliothèques.

### Districts de dénombrement

Pour les besoins du recensement, les provinces étaient divisées en districts et en sous-districts, les districts de dénombrement correspondant, à de rares exceptions près, aux circonscriptions électorales. En général, les cités et les comtés étaient considérés comme districts, tandis que les villes, les cantons et les quartiers d'une ville étaient des sous-districts. Quant aux villages, aux petites villes, aux paroisses et aux seigneuries, ils étaient généralement recensés à l'intérieur du canton dont ils faisaient partie. Toutefois, les usagers doivent se rendre compte qu'un district de dénombrement ne correspondait pas toujours au même comté; par exemple, Loughborough Township (comté de Frontenac en Ontario) est situé dans le district de Frontenac pour les recensements de 1851 et 1861, mais fait partie du district d'Addington pour ceux de 1871 et de 1881. De plus, l'étendue d'un district pouvait diminuer d'un recensement à l'autre et certains disparaissaient même avec la venue de nouveaux districts. En outre, les noms des endroits peuvent avoir changé. Ainsi, par exemple, on trouve bien clairement Ottawa pour la période 1861-1881, mais, en 1842, cette municipalité est mentionnée comme section du comté de Carleton, et, en 1851, elle apparaît sous le nom de Bytown. Les usagers du catalogue voudront peut-être consulter un bon atlas historique ou encore une collection de cartes historiques pour faciliter leurs recherches.

Dans le catalogue, les numéros des bobines de microfilm renvoient à des résultats particuliers, ce qui ne signifie pas pour autant que les résultats d'un district particulier remplissent toute une bobine. Il se peut que les bobines renferment les résultats de plus d'un district et que certains districts soient répartis sur plus d'une bobine.

## Names of Districts and Sub-Districts

Names have been entered according to the information obtained from the original census forms, and may therefore differ slightly from present day appellation. Entries have been standardized where possible, abbreviated words have been written out in full, and cross-references have been supplied.

## Census Returns, 1666-1861

The first census in Canada was undertaken in 1666 by Intendant Jean Talon who listed 3,215 inhabitants. Talon is considered the "father" of modern census taking in Canada, for his work provided details of the basic resources and needs of the colonies and opened the way for future censuses to be taken on a regular basis. After the French Régime, census taking became less frequent. While a census was taken in Lower Canada in 1825 and in 1831, it was not until after the Act of Union of 1841 that provision was made for the regular taking of a census in Upper Canada, beginning in 1842. In 1851, legislation authorized the taking of a census in 1852 and established the pattern of decennial censuses which has continued to the present. However, not until Confederation in 1867 did the taking of the census become a constitutional requirement, and in 1871, the first Dominion census was conducted.

Users of the census will notice significant additions to the records in each successive census year. Most records prior to 1825 simply indicate heads of households, and in many instances are incomplete. Those which are nearly complete and easily located within a series have been included in this catalogue. The 1825 census indicates the head of the household, the number of persons living in each household, age groups and marital status. The censuses for 1831, 1842, 1851 and 1861 answer essentially the same questions but in greater detail, and give information pertaining to houses occupied, number of buildings, types of housing, property ownership, land occupied, place of birth, age, sex, marital status, infirmities, religion, occupation or profession, education, agricultural crops, farm animals and their products, taverns or houses of public entertainment, stores where spiritous liquors are sold, mills, manufacturers, distilleries and wages paid to individuals. A few early returns contain only aggregate figures and give no names. It should also be noted that for the period prior to 1851 the records are not necessarily complete for all years and may consist only of a few pages for any given area. From 1851 onward all persons, not just heads of households, were enumerated, and an agricultural census was compiled separately. Such agricultural returns enumerated the extent of farm properties, type and number of implements, crops, livestock and farm products. The Appendix indicates whether the census returns are nominal or merely heads of households.

## Noms des districts et des sous-districts

Les noms ont été inscrits selon les renseignements provenant des formules de recensement originales et peuvent différer quelque peu de l'appellation moderne. Les notices ont été normalisées dans la mesure du possible, les mots abrégés ont été écrits au long et des renvois ont été fournis.

## Recensements dressés entre 1666 et 1861

L'intendant Jean Talon peut être considéré comme le «père» du recensement au Canada. En effet, on lui doit le premier recensement à être effectué en terre canadienne, en 1666 : il dénombra 3 215 habitants et dressa l'inventaire des ressources et des besoins fondamentaux de la colonie; c'est aussi à partir de cette date que les recensements ont commencé à être effectués à intervalles réguliers. Après le régime français, les recensements devinrent moins fréquents. Bien que des recensements aient été effectués dans le Bas-Canada en 1825 et en 1831, ce n'est qu'après l'Acte d'Union (1841) que le recensement périodique devint obligatoire dans le Haut-Canada, à partir de 1842. En 1851, une loi fut promulguée pour autoriser qu'un recensement soit effectué en 1852 et, par la suite, à tous les dix ans; cela se fait encore aujourd'hui. Ce n'est qu'en 1867, année de la Confédération, que le recensement devint une exigence constitutionnelle. Le premier recensement du Dominion du Canada a eu lieu en 1871.

Les chercheurs constateront que chaque recensement comporte d'importants ajouts par rapport au précédent. La plupart des recensements antérieurs à 1825 ne mentionnent que les noms des chefs de famille et sont très souvent incomplets. Ceux qui sont presque complets et qui s'insèrent facilement dans une collection ont été intégrés au présent catalogue. Le recensement de 1825 donne le nom du chef de famille, le nombre de personnes par famille, les groupes d'âge, et l'état matrimonial des particuliers. Les recensements de 1831, 1842, 1851 et 1861 répondent en général aux mêmes questions, mais de façon plus détaillée; ils apportent des précisions sur les maisons habitées, le nombre de maisons, les types de logements, les propriétaires, la superficie des terrains, le lieu de naissance, l'âge, le sexe, l'état matrimonial, les infirmités, la religion, le type d'occupation ou de profession, l'éducation, les récoltes, les animaux de la ferme et leurs produits, les tavernes, les lieux de divertissement, les magasins de spiritueux, les moulins, les fabricants, les distilleries et les salaires. Quelques-uns des plus anciens recensements ne contiennent que des chiffres sans aucune mention de noms. Autre fait à noter, les dossiers antérieurs à 1851 ne sont pas tous complets et ne peuvent comprendre que quelques pages pour un secteur donné. À partir de 1851, non seulement le chef de famille mais aussi tous les membres de la famille sont recensés. Il y a également à cette époque des recensements agricoles qui fournissent des données sur l'étendue des fermes, le type et le nombre d'instruments aratoires, les récoltes, les têtes de bétail et les produits de la ferme. L'annexe précise si les recensements sont nominaux ou s'ils ne tiennent compte que des chefs de ménage.

In the 1861 census for Ontario and Quebec, the agricultural returns appear at the end of the nominal census for the whole county. For example, the nominal returns for Belleville, Ontario for 1861 are on Reel C-1032, but the agricultural returns for the same town are found on Reel C-1034. Users of the 1861 film are encouraged to search the whole section on agriculture as returns are not always found in one place for any given area.

### Census of 1871

The most extensive and by far the most comprehensive census records in our custody are those for the year 1871. These records have been organized and filmed so that all nine schedules for each enumeration district are brought together as a unit. The nine schedules are:

1. Nominal return of the living.
2. Nominal return of the deaths within the last twelve months.
3. Return of public institutions, real estate, vehicles and implements.
4. Return of cultivated land, of field products and of plants and fruits.
5. Live stock, animal products, home-made fabrics and furs.
6. Return of industrial establishments.
7. Return of products of the forest.
8. Return of shipping and fisheries.
9. Return of mineral products.

Users of the 1871 census records should be aware that it is possible to relate the information in schedules 3, 4, 5, 7, 8 and 9 directly to the nominal return (Schedule 1). In these six schedules, page and line references to the nominal return are located in the first column of each page, entitled "Reference to Schedule 1".

### Census of 1881

In 1881, the number of schedules was reduced to eight by combining the return of industrial establishments with the return of real estate and public institutions. Only a microfilm copy of the nominal returns (Schedule 1) has survived. There are no other schedules extant. Because the microfilm of the 1881 census, produced in the 1950's and received by the Public Archives of Canada in 1979, is not of a consistent quality, not all images are decipherable. In 1881, Prince Edward Island was enumerated by Lot only. Entries for that year may be found under the appropriate Lot number.

### Arrangement and Format of the Catalogue

Entries in this catalogue usually consist of two basic components, a sub-district and a district. A sub-district is entered in standard type, while a district is presented in bold-face upper case type.

Pour l'année 1861, en Ontario et au Québec, les données du recensement agricole figurent à la suite de celles du recensement nominal de tout le comté. À titre d'exemple, les résultats du recensement nominal de Belleville (Ontario), en 1861, se trouvent sur la bobine C-1032, mais ceux du recensement agricole de cette ville sont sur la bobine C-1034. Les chercheurs qui utilisent le film de 1861 sont invités à consulter toute la section sur l'agriculture parce que les résultats ne se trouvent pas toujours à un seul endroit pour un secteur donné.

### Recensement de 1871

En matière de recensement, les dossiers les plus exhaustifs sont ceux de l'année 1871. Ils ont été disposés et microfilmés de façon à réunir les neuf tableaux d'énumération de chaque district, à savoir :

1. Dénombrement des vivants.
2. Dénombrement des morts des douze derniers mois.
3. Établissements publics, biens immobiliers, voitures et instruments aratoires.
4. Terres cultivées, produits des champs, plantes et fruits.
5. Bétail, produits d'origine animale, tissus confectionnés sur place et fourrures.
6. Établissements industriels.
7. Produits forestiers.
8. Navigation et pêcheries.
9. Produits minéraux.

On rappelle aux usagers du recensement de 1871 qu'il existe des renvois à l'indicateur n° 1 pour les listes 3, 4, 5, 7, 8 et 9. Les renvois (page et ligne) sont inscrits dans la première colonne de chaque page, sous la rubrique « Renvoi à l'indicateur n° 1 ».

### Recensement de 1881

En 1881, le nombre d'indicateurs ou de tableaux est passé de neuf à huit car les établissements industriels ont été groupés avec les biens immobiliers et les édifices publics. À l'exception d'une copie microfilmée des résultats nominaux (tableau n° 1), il n'est subsisté aucun autre tableau de ce recensement. Cette copie date des années 1950 et a été confiée aux Archives publiques du Canada en 1979; sa qualité laisse parfois à désirer, et par conséquent certaines images ne sont plus très claires. En 1881, l'Île-du-Prince-Édouard fut recensée par lots. On trouvera donc les résultats de ce recensement en se référant au numéro du lot approprié.

### Disposition et présentation du catalogue

Les notices du catalogue se composent habituellement de deux éléments, un sous-district et un district. Les sous-districts sont dactylographiés en lettres minuscules et les districts, en lettres majuscules plus foncées.

Names of districts and sub-districts are listed together in alphabetical order. Some sub-districts have modifiers in parentheses, such as Village, North, East, West, South and Ward. For purposes of the alphabetical arrangement, these modifiers have only been considered when the two basic components are exactly the same, as in this example:

Farnham (Ouest/West) **MISSISQUOI**

Farnham (Village) **MISSISQUOI**

Entries for districts precede sub-districts of the same name, for example:

**KENT**

Kent **CARLETON**

A typical entry reads:

Boucherville	<b>CHAMBLY</b>	
1851	C-1117	
1861	C-1271	Agr. only/seulement
1871		
i-1	C-10061	8
i-2	C-10061	8, 9
1881	C-13205	

The elements of the entry are explained below:

Boucherville	Name of sub-district ( town or township).
<b>CHAMBLY</b>	Name of district (city or county).
1851	A year for which there is a return.
1871	For purposes of administration and ease of compilation, during the enumeration of the 1871 and 1881 censuses sub-districts were divided into smaller units. Such divisions were indicated by an alpha-numeric code, such as i-1.
i-1	
i-2	
C-1117	Microfilm reel number on which census returns are located.
Agr. only	The abbreviations given opposite the census listing for the years 1825-1861 indicate any deficiencies in the holdings for those years. Abbreviations used are as follows:
Aggregate only	Totals only - no names
Agr. incomplete	Agricultural census incomplete
Agr. missing	Agricultural census missing
Agr. only	Agricultural census only
Pers. incomplete	Personal census incomplete
Pers. missing	Personal census missing

Les districts et les sous-districts sont répertoriés ensemble dans l'ordre alphabétique. Quelques-uns d'entre eux sont qualifiés entre parenthèses à l'aide de termes comme village, Nord, Est, Ouest, Sud, quartier. Pour la disposition alphabétique, on n'a tenu compte de ces qualificatifs que lorsque les deux éléments fondamentaux étaient identiques, comme dans l'exemple suivant :

Farnham (Ouest/West) **MISSISQUOI**

Farnham (Village) **MISSISQUOI**

Les notices des districts précèdent les sous-districts du même nom, par exemple :

**KENT**

Kent **CARLETON**

Voici un exemple typique de notice :

Boucherville	<b>CHAMBLY</b>	
1851	C-1117	
1861	C-1271	Agr. only/seulement
1871		
i-1	C-10061	8
i-2	C-10061	8, 9
1881	C-13205	

Les différents éléments de cette notice sont expliqués ci-après :

Boucherville	Nom du sous-district (ville ou canton).
<b>CHAMBLY</b>	Nom du district (cité ou comté).
1851	Année pour laquelle il existe un recensement.

i-1	
i-2	
C-1117	Numéro de la bobine de microfilm où l'on a enregistré les résultats d'un recensement.

### Accès aux renseignements

Toute bibliothèque ou tout autre établissement possédant un lecteur de microfilm 35 mm et participant au prêt entre bibliothèques peut emprunter des microfilms, à raison de trois bobines par emprunt. Les demandes de prêt doivent se faire sur les formules autorisées et être adressées aux Archives publiques du Canada, 395, rue Wellington, Ottawa (Ontario), Canada, K1A 0N3.

With the exception of the 1881 census, microfilm copies of those reels coded "C" can be purchased at our standard charge, which at time of publication is \$16.00 per reel, payable in advance by cheque or money order to the Receiver General for Canada. Reels coded "F" or "M" have been obtained from archives in France and from provincial institutions and are not generally for sale. Enquiries as to the availability of "F" and "M" reels, the 1881 census and price changes should be directed to the Public Archives of Canada. Enquiries will be forwarded as appropriate to the institution holding the master negative or controlling the duplication and sale of specific microfilm.

All census records on microfilm are available in the self-service reading room of the Public Archives of Canada. The reading room is open seven days a week, including holidays. However, on their initial visit, researchers must register during regular office hours, 8:30 a.m. to 4:45 p.m., Monday through Friday.

This catalogue does not include a large number of fragmentary returns, lists of householders or residents of small localities and other documents which complement the main census returns. Since most of these items cannot be readily located within a specific microfilm reel, it is necessary for a researcher to use a guide before consulting the film. Finding Aid 300 provides the necessary guidance, in the form of specific volume and page or other references. This finding aid can be photocopied for a fee and is also available on microfiche. Copies of shelf-lists of census returns for the years 1851, 1861, 1871 and 1881 are also available for a fee.

Users of the census records may find additional benefit in consulting complementary sources found in the holdings of the Public Archives of Canada. Such sources are: Manuscript Group (MG) 8, Records of New France and Quebec (18th to 20th centuries); MG 9, Provincial, Local and Territorial Records; Record Group (RG) 3, Post Office; RG 12, Transport; RG 10, Indian Affairs; RG 11, Public Works; RG 15, Interior; RG 17, Agriculture; RG 18, Royal Canadian Mounted Police; RG 38, Veterans Affairs; and RG 76, Immigration Branch. Some of the material found in the above sources is available on microfilm and may be borrowed on interlibrary loan, however, most of the material has not been filmed and may only be consulted upon a personal visit to the Public Archives of Canada.

Federal Archives Division

Sauf pour le recensement de 1881, on peut se procurer des copies microfilmées des bobines codées «C». Leur coût actuel est de \$16 la bobine, payables à l'avance au receveur général du Canada, sous forme de chèque ou de mandat. Quant aux bobines codées «F» ou «M», elles proviennent d'archives françaises ou provinciales et ne sont généralement pas vendues. Les demandes relatives aux bobines de type «F» ou «M», au recensement de 1881 et aux changements de prix devraient être adressées aux Archives publiques du Canada. Ces demandes seront alors référées, si nécessaire, à l'institution qui conserve le négatif original ou qui contrôle la reproduction et la vente de tel ou tel microfilm.

Les recensements qui ont été reproduits sur microfilm sont conservés dans la salle de lecture libre-service des Archives publiques du Canada. Cette salle est ouverte 24 heures sur 24, sept jours par semaine, y compris les jours fériés. Cependant, à leur première visite, les chercheurs doivent s'inscrire pendant les heures normales de service, soit du lundi au vendredi, entre 8 h 30 et 16 h 45.

Ce catalogue ne fait pas état d'un bon nombre de résultats fragmentaires, ni des dénombrements des chefs de famille ou des résidents de petites localités, sans parler des diverses informations complémentaires qui viennent souvent compléter le recensement principal. La plupart de ces informations étant difficiles à repérer sur une bobine de microfilm, le chercheur devra consulter un guide, en l'occurrence l'instrument de recherche 300; il y trouvera le volume et la page exacts, ainsi que d'autres renseignements pertinents. Cet instrument de recherche 300 peut être xérogaphié moyennant paiement; il existe aussi sur microfiche. Il est également possible d'acheter des copies des fichiers topographiques pour les recensements des années 1851, 1861, 1871 et 1881.

Les chercheurs auront intérêt à consulter les sources complémentaires qui se trouvent dans les fonds des Archives publiques du Canada. Il s'agit du groupe de manuscrits (MG) 8, Documents relatifs à la Nouvelle-France et au Québec (XVII<sup>e</sup> -XX<sup>e</sup> siècles); du MG 9, Documents relatifs aux provinces, aux territoires et aux municipalités; du groupe d'archives (RG) 3, Postes; du RG 12, Transports; du RG 10, Affaires indiennes; du RG 11, Travaux publics; du RG 15, Intérieur; du RG 17, Agriculture; du RG 18, Gendarmerie royale du Canada; du RG 38, Affaires des anciens combattants; et du RG 76, Direction de l'immigration. Certains des documents faisant partie des sources précitées ont été microfilmés et peuvent être empruntés par l'entremise du prêt entre bibliothèques; cependant, la plupart d'entre eux n'ont pas été microfilmés et ne peuvent être consultés qu'aux Archives publiques du Canada.

## CENSUS RECORDS AVAILABLE ON MICROFILM/RECENSEMENTS DISPONIBLES SUR MICROFILM

Only microfilmed records are available for research purposes.

The original paper record exists at the Public Archives of Canada for all microfilmed records listed below with a "C" prefix, except for the year 1881. The original records for the year 1881 no longer exist. The original records for all microfilm reels prefixed with an "F" or "M" do not exist at the Public Archives of Canada but rather in other institutions.

Symbol "N" denotes nominal returns listing all members of households.

Symbol "HF" denotes returns listing heads of families only.

Seuls les microfilms sont mis à la disposition des chercheurs.

Les Archives publiques du Canada possèdent les originaux des microfilms précédés de la lettre «C», excepté pour l'année 1881; les originaux de cette année-là n'existent plus. Ceux des bobines précédées des lettres «F» ou «M» se trouvent dans d'autres établissements.

Le symbole «N» désigne un dénombrement incluant tous les membres d'un ménage.

Le symbole «HF» désigne un dénombrement des chefs de famille seulement.
